## The ARACY Conference

Carbon Neutral's mission is to reduce carbon emissions through education and revegetation.

Has contributed to offsetting an estimated 31.91 tonnes of carbon emissions by the planting of native trees.

We are a not for profit company working with hundreds of organisations and thousands of individuals to measure, reduce and offset carbon emissions and support revegetation projects.

Carbon Neutral partners with Men of the Trees in Western Australia, Trees for Life in South Australia, and Landscapes for Life in Victoria. Together these organisations have contributed over 39 million native trees to the Australian landscape over the past 30 years.
